

STEEL DRUM PRODUCTION

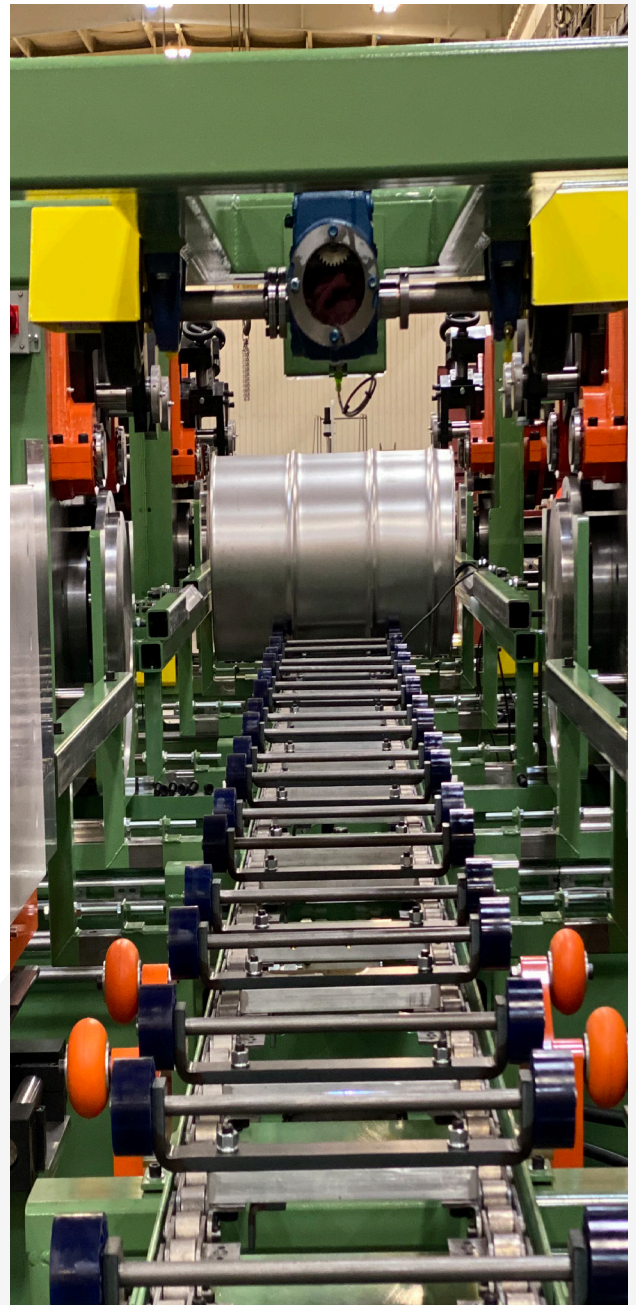

HISTORY AND EXPERIENCE

Grotnes got its start in packaging back when we were manufacturing wooden barrels. For over 120 years Grotnes has been developing drum production. Our technology uses a modular system that allows for a very flexible process. Production lines can be configured in many ways for vertical or horizontal transfer.

PROVEN PERFORMANCE

In manufacturing plants all over the world there is Grotnes forming equipment that is standing the test of time. The Grotnes reputation for robust metal forming solutions has defined us for over a century.

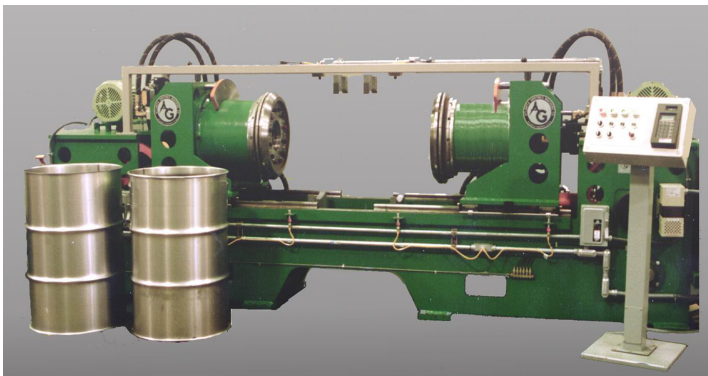

EXPANDING

STEEL DRUMS

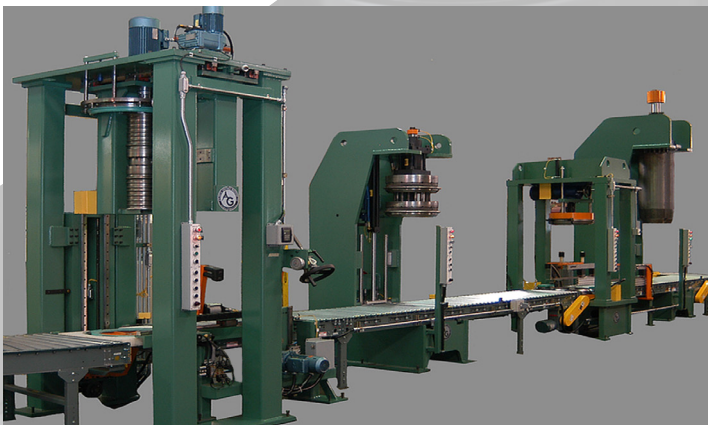

ALWAYS EVOLVING

Grotnes has always prided itself on improving the process. Our Engineering team is focused on making a machine that is easy to operate and maintain. Our controllers have simple to understand recipe driven programs. Our latest equipment is using servo electro-mechanical options in place of older hydraulic solutions.

MANUAL TO AUTOMATIC

Grotnes equipment is highly configurable. Whether you want a stand-alone machine or a fully automated line, we can configure a system to exactly what you need.
